GSM Intercom

GSM-1000V

Product Information Sheet

GSM-1000V GSM Access Control system allows Caller ID control of doors, shutters, barriers and road blocks.

Quick learn features

Quickly store Caller ID of users by putting the system in auto-learn mode. When a call arrives, the Caller ID is stored and a confirmation text is sent to the administrator.

Easy programming by a single call

Call the unit from the administrators number and manually program users numbers in by DTMF keypad tones on your phone.

Remote Control

Open gates from anywhere with a quick phone call that the system does not answer. Once the Caller ID has been matched the relay pulses. If the Caller ID not known then the call is simply ignored.
